

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Unit) housing. On the left is the empty grey plastic housing with a circular cutout for a screen. On the right is the assembled unit with a green circuit board, a yellow battery, and a circular copper coil. A black ruler with white markings is placed horizontally below the components for scale. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of the green circuit board component. It features various electronic components, including a large silver capacitor, a USB port, and a battery connector. A black ruler with white markings is placed horizontally below the component for scale. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph of a small green printed circuit board (PCB) component, identified as H-12(H-19), placed on a blue textured surface. The component is positioned next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 40 mm wide and 15 mm high. The component features various electronic components, including a red capacitor, a black integrated circuit, and several surface-mount components. The text 'H-12(H-19)' is visible on the right side of the board.
Solder Board-Component View 3	 A photograph of a yellow and white lithium-ion battery component, identified as 120-2011, placed on a blue textured surface. The battery is positioned next to a black ruler with white markings in millimeters. The ruler shows the battery is approximately 100 mm wide and 20 mm high. The battery has a white label with black text and a barcode. The text '120-2011' is visible on the label. The battery is connected to a small circuit board with several wires (red, black, and orange) extending from it.
