	ve reviewed the documentation submitted for the application referenced above and find the the g items need to be addressed before this review can be completed.
Manual (CC ID number is not allowed to contain lower case letters. The FCC ID label exhibit, the Users (includes the FCC ID number in the RF Exposure section) and the FCC Compliance Ceports provide updated to use an upper case 'X' in place of the lower case 'x'.
capable of provide t	levice is capable of operating from either an internal battery or from an AC power supply. Since it is of operating from just a battery, the battery end-point Frequency Stability test is applicable. Please the Frequency Stability test compliance data for the battery end-point (the note on page 7 of 22 state test was performed).
device an indicate	Jsers Manual has an RF Exposure stating Body-worn information. This device is a desk/wall mount and therefore body-worn operation is not appropriate. Please adjust this information in the manual to near-body operation and specify the 2.5cm separation requirement as documented in the SAR ements. (This similar situation was resolved in application for FCC ID: RFLACW1XT800.)
Please le	et me know if you have any questions.
Best rega	ards,
Chris Ha	arvey
