The diagram illustrates the correct technique for using a hearing aid. It consists of two parts: 1. Inserting the hearing aid into the ear. 2. Adjusting or removing the hearing aid. The diagram shows a side profile of a head with a hearing aid being inserted into the ear canal. A green arrow indicates the direction of insertion. A second green arrow indicates the direction of adjustment or removal. The hearing aid is shown in two positions: one being inserted and one being removed.
