

EXHIBIT 1

FUNCTIONAL DESCRIPTION
SECTION 2.1033(b)

CFS8DL5869-1

SECTION 2.1033(b) (2a). For Part 15 a brief description of the circuit functions of the device.

The 5869-1 is a battery powered panic alarm transmitter and is part of a wireless-alarm system. It is used in conjunction with a receiver (5881) to indicate an holdup to the alarm system. These messages are transmitted at 345Mhz +/-82Khz using on-off keyed AM modulation. The 5869-1 sends a regular supervision or check-in message, no more often than once per hour. It also sends messages initiated by the condition of the built in panic switch.
