| <div>Solder<br/>Board-Component View<br/>4</div> |  A photograph of a green printed circuit board (PCB) component, labeled '4', placed on a blue textured surface. The component is rectangular with several circular solder pads and a central integrated circuit. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters. The ruler markings range from 0 to 100 mm.                                                                |
| <div>Solder<br/>Board-Component View<br/>5</div> |  A photograph of a green printed circuit board (PCB) component, labeled '5', placed on a blue textured surface. The component is rectangular with various electronic components, including a large black integrated circuit, several capacitors, and a small orange component. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters. The ruler markings range from 0 to 100 mm. |

| <div>Solder<br/>Board-Component View<br/>6</div> |  <p>A photograph showing a green printed circuit board (PCB) with a white, multi-stranded flexible cable coiled on top. The cable is secured with a yellow tape. The PCB is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has various components, including a 5V regulator and several resistors.</p> |
| <div>Solder<br/>Board-Component View<br/>7</div> |  <p>A photograph showing the same green PCB as in View 6, but with a black circular component (likely a thermal pad or a component) placed on top. The PCB is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has various components, including a 5V regulator and several resistors.</p>              |
