

ADDENDUM TO OEM GUIDANCE

[INTENDED TO BE ATTACHED TO USER GUIDE AFTER EXISTING OEM GUIDANCE SECTION.]

This addendum has been created to provide guidance regarding integration of Espressif radio module, Model ESP32-WROVER-E in Steelcase DeskWizard, Model DW10DEV.

When integrated and operating within host Steelcase DW10DEV, the Espressif radio module, ESP32-WROVER-E duty cycle is managed as follows:

1. 0.16% calculated TX duty cycle during Over-The-Air (OTA) updates, with maximum duration of 1-2 minutes. NOTE: OTA updates occur less than once monthly during off-peak hours (typically when no user is present)
2. 0.02% calculated TX duty cycle during normal continual operation.

When Espressif radio Module Model ESP32-WROVER-E is integrated within host device, Steelcase DeskWizard Model DW10DEV, the combination complies with FCC radio limits set forth for an uncontrolled environment and approved for portable use (per 47 CFR 2.1093).
