

# Antenna Specification

## Specifications

### Summary

| ITEM                 | SPEC.                            |                                 |
|----------------------|----------------------------------|---------------------------------|
| Antenna Type         | PCB Antenna                      |                                 |
| Center Frequency     | 2402 MHz<br>2441 MHz<br>2480 MHz | 2.34 dBi<br>2.07dBi<br>1.45 dBi |
| MAX. GAIN            | 2.34 dBi                         |                                 |
| Polarization         | Horizontal                       |                                 |
| Azimuth Beam Pattern | Omni-directional                 |                                 |
| Impedance            | 50 $\Omega$                      |                                 |
| Antenna Length       | 3.1 cm                           |                                 |
| Model Name           | HRW01                            |                                 |
| manufacturer         | B.O.W                            |                                 |
