

Operational Description

The transmitter of the EUT is powered by power adapter and connected with notebook through RJ45 port. The antenna used in this product is Dipole Antenna. There are two combinations on the antenna connector that MCX and Reversed TNC. Under normal use condition, the user has to keep at least 20cm separation distance between radiator and the body of the user.

The other instruction, please have a look at the users manual.

DSSS Information

This device is Direct Sequence Spread Spectrum, the data is mixed by pseudorandom code which is an orthogonal code. The mixed data is digital modulated by BPSK and QPSK technique depends on the data rates.

The CCK coding is applied for increasing the data rate, and also the processing gain will be increased. The bit rates are 1,2,5.5,11,22Mbps.
