

UWB channels

Date: 04/03/2022

To whom it may concern:

We,

Rombit NV

Meir 30, Antwerpen, Belgium Zip code 2000

hereby declare that our Products Romware M-Anchor 100 and Driverbox contain a UWB transceiver capable of transmitting on UWB channel 2 and 5.

As these are world-wide marketed devices, and different regions pose restrictions on channels allowed, the relevant channels are switched on during installation of the device by a Rombit-certified technician.

This channel configuration is done remotely by Rombit and is not accessible by the end-client or other parties in any way.

The end-client is informed of this restriction, and is required to sign a waiver informing him of his responsibility when transporting the device outside the intended region without having it reconfigured.

Sincerely,

DocuSigned by:
