Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC AUTHORIZED  
Transceiver with FCC ID:AZ489FT4922

Dear Sir/Madam,

A permissive change is requested for the subject transceiver which is marketed in the United States and elsewhere.

**A. DESCRIPTION OF PRODUCT CHANGES:**

Wafer Fab change on a current part due to manufacturing site change and a new PA Driver has been implemented from approved supplier list (ASL). The PA Driver changes are:

- 1) pin-to-pin compatible
- 2) has the same basic function as the previous chip
- 3) no change in radio parameters
- 4) does not impact PCB re-layout

**B. PERFORMANCE DIFFERENCES:**

SAR was tested and the result does not show any degradation. However, degradation was found in Radiated Spurious Emission compared to the original filing and still within the FCC limits.

**C. CONCLUSION:**

This radio continues to meet all FCC emissions requirements for which authorization was granted, thus this change does meet requirements of a Class-2 Permissive Change.

Sincerely,

Arine Lee  
Regulatory Compliance Engineer
