BYTECH THE ART OF TECHNOLOGY

BY-OP-CP-508-BK

Included Items: 1 Wireless Charger 1 20 inch (50 cm) USB Type-C Charging Cable 1 Manual

Getting Started:

1. Connect your wireless charger stand to a DC power adapter. Use the charging cable (included) to connect the Type-C to the corresponding port on I the stand, and the USB part to the power adapter (not included) USB port. 2. When the power is turned on, the blue light and red light will flash once respectively, and red light is solid to show that the Wireless charger is ready.

Place the charger on a level surface.

Phone Pad Charging:

1. Place your phone on the charger with the display facing forward. For best performance, center it on the charge pad.

2. Your phone should start charging a few seconds after you place it on the wireless charging pad. You should see in the phone battery status icon and the pad indicator light will hold blue. It still hold blue when your phone battery has been fully charged.

Airpods Pad Charging:

1. Place your Airpods (in case) on the center of the charge pad.

2. You Airpods should start charging a few seconds after you place it on the wireless charging pad. You should see the pad indicator light will hold blue. It still hold blue when your Airpods battery has been fully charged.

Apple watch charging:

1. Insert the USB tip of your Apple watch magnetic charging cable(not included) through the holster support ring and plug into the USB port at the back of the wireless charger stand.

2. Fit the main charging body of the magnetic charging cable into the support ring so that the cable is facing down and fit into the groove.

3. Place your apple watch on the charge surface to charge.

LED light status:

1. When the power is turned on, the blue light and red light will flash once

respectively, and red light is solid to show that the Wireless charger is ready. When charging your device, the indicator will glow blue.

3. When fully charged, the indicator light remains solid blue.

 We strongly recommend using an adapter with an output no less than 2A. Insufficient input may cause unstable charging.

BE SURE TO FOLLOW ALL SAFETY WARNINGS BELOW:

2. It's normal for your device to get slightly warm during the inductive charging.

It has an overheating protection function built in.

3. Compatible with most kinds of phone covers cases, including rubber cases, hybrid cases, plastic/TPU/PC cases also. Not recommended to use the charger with metal covers or metal accessories

4. Keep away from direct sunlight, fire, water or humidity and high voltage

equipment. Do not store the item inside a car during hot weather. 5. Make sure that the plate doesn't get too hot. If it does, take your phone away from the plate and switch the charger off. When the plate has cooled down try

Do not try to open, crush, puncture or deform.

7. Keep out of reach of children.

8. Do not place the charger closely to the magnetic stripes or chip cards (ID cards, bank cards) to avoid magnetic failure.

Specifications:

Wireless charger: 5V/1A

• Wireless charger output: Phone 5W + Airpod 5W

USB output: 1A

Charging distance: ≤ 6mm

Charging efficiency: ≤ 65%

Size: 200\*20\*72mm

\* Compatible with most smartphones with Qi Wireless Charging capability, such as: Apple iPhone 8 series/X-Series/11 series/12 Series/13 Series/SE; Samsung Galaxy S6-S21 Series /Note 8 & Later/Galaxy Fold/Galaxy Flip; LG G2-G7 Series/ThinQ Series; Google Pixel 3-6 Series & more.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no quarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
