SUBJECT: Permissive Change Request for Inventek FCC ID: 07P-4343

Dear Timco:

The Inventek Module bearing the FCC ID number referenced above, is going to be used in a host which is designed for portable use, so SAR Data and report are being submitted as proof that the module meets requirements under these circumstances. No changes have been made to the module itself, and the installation of the module into the host does not affect the original compliance information and test report data submitted.

Best Regards,

A handwritten signature in black ink, appearing to read "G Yang", is placed below the "Best Regards," text.
