Simple trouble shooting of pet feeder

- O1 Please check if you can't connect. a): The WiFi name and password should not be in Chinese or more than 12 digits . Please use combination of numbers and letters . 5G WiFi signal is not supported. Please use 2.4G WiFi signal. b): Some community broadband, radio and television broadband, multi-level network or mobile Tietong network, due to network restrictions, the feeder can not connect to the network server, so it is recommended to use Telecom or Unicom Network. c): Some software conflicts in the phone will also cause connection failure. Please restart the phone. Turn off the non mobile system software that starts with the phone, turn on Bluetooth and location, and then try reconnecting to the feeder.
- 02 If the feeding device is inaccurate or not feeding, please check whether there is too much food in the food plate and whether the food channels is blocked. Please clean the food outlet and channels. When using the battery power supply, please check whether the battery is dead and whether the battery leaks.
- The device shows offline. Please check the distance between the device and the router at home. Do not exceed 10 meters. Try not to partition the middle. According to WiFi characteristics, the WiFi signal on the partition wall will drop sharply, resulting in unstable connection offline.
- Of there is no response after starting the machine, check whether the power supply is plugged in and whether the power switch is turned on. If they are all plugged in, please check whether the power supply is damaged, contact customer service to buy the power supply or return to the factory for maintenance according to the judgment.

How to clean the feeder?

This product cannot be placed outdoors or exposed to the rain. Please use a wet cloth to clean it and prevent water from entering the feeder. The food tank and food bowl can be washed by water.

FCC warning statements:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
