

Requirement of TCB Council Workshop “996369 D03 Module Integration Instructions & TCB Review”	Comply (Y/N)
<p>1. General: Manufacturer and Integrator roles and responsibilities for host product compliance.</p> <p>Module intended purpose and certification type, if applicable restrictions to grantee host products, requirements for continued FCC compliance, and end user manual requirements. Grantee support resources available to the Integrator, and a statement that deviation from the instructions will require the grantee approval.</p>	<p>Y</p> <p>The certification information was show in the page 12~14 of the user manual and will provide the support resources (page 12) to the Integrator and statement deviation will require the grantee approval.</p>
<p>2. Applicable module certification rules that host product must remain in continued compliance.</p>	<p>Y</p> <p>The compliance of the module certification rules was show on the page 10 of the user manuals.</p>
<p>3. Summary of operational use conditions, regulatory statements, sale restrictions.</p> <p>The use conditions must be clear and if there is a change what procedures a host manufacturer must follow. Ex: simultaneous transmission, indoor use only, operation on aircraft, use in grantee products only, . . .</p>	<p>Y</p> <p>The use condition was show in Page 1 of the user manuals which is use for industrial and consumer markets.</p>
<p>4. Limited certification requirements to be addressed when integrating into a new host product.</p> <p>If applicable, the manufacturer must clearly define what the Integrator must do to address grant limitation based on a method approved via KDB inquiry. Limited certification is akin to conditional certification predicated on method(s) to mitigate limitation in the final host product.</p>	<p>Y</p> <p>Airtouch (Shanghai) Intelligent Technology Co., Ltd clearly outline these requirements and provide necessary guidance and support (contact info. on page 12). By adhering to these requirements, the integrator can ensure that the final host product meets all applicable standards and requirements.</p>
<p>5. Trace antenna designs, if applicable, must detailed in accordance with 996369 D02 Q&A #11.</p>	<p>N</p> <p>Not a trace antenna Integrated Patch Antenna was used in this module.</p>
<p>6. RF exposure conditions and host product configuration must be detailed here.</p> <p>Any deviation in conditions or host configuration will require approval and FCC filing by the Grantee in accordance with KDB 447498.</p>	<p>Y</p> <p>The module will be installed in a product which has a distance greater than 20cm to the end user (show on page 13 of the user manual).</p>
<p>7. Antennas requirements</p> <p>Acceptable antenna type(s), gain, connector, professional installation, packaging with host product, etc.</p>	<p>Y</p> <p>Integrated Patch Antenna (page 12) was fixed on the PCB which can't be changed by end user.</p>
<p>8. Label and Statements for compliance</p>	<p>Y</p> <p>This information was show on page 13 of the</p>

<p>"Contains FCC ID" labeling (KDB 784748) and regulatory statements requirements for the final host products</p>	<p>manual.</p>
<p>9. Information on test mode(s) configuration.</p> <p>Test modes/instructions for standalone and simultaneous transmission configurations in accordance with 996369 D04.</p>	<p>Y</p> <p>The test modes configuration was show on page 12-13 of the user manual.</p>
<p>10. Additional testing, Part 15 Subpart B disclaimer</p> <p>Integrator is responsible for host product compliance with applicable FCC rules</p>	<p>Y</p> <p>The FCC 15B compliance requirement for Host product manufacturer was show in page 14~15 of the manual.</p>
<p>11. Note EMI Considerations</p> <p>KDB publication 996369 D02 and D04 for guidance on module integration and best practices.</p>	<p>Y</p> <p>The EUT is compliant with all applicable FCC rules. Details parameter configuration for the module was show in page 1~11 of the manual.</p>
<p>12. How to address changes to conditions, operation and/or restrictions</p> <p>What procedures a host integrator must follow to address changes. Grantee policy/contact information to address permissible changes if required by host integrators.</p>	<p>Y</p> <p>The module should be installed and with a minimum distance of 20cm between the product and end user. The host integrator must follow this compliance condition or New FCC ID is needed for the host equipment. Show in page 12~14 of the manual.</p>
