

1) Strong justification that test reports for a device with a different FCC ID are valid for this device. Please detail all differences between the two devices. Provide updated test data as appropriate.

Incorrect reports uploaded, correct reports have been uploaded.

2) Updated rule part 22 stated on the Form 731. Please be more specific E.G. 22.901(d).

Correction made

SAR

1) Confirmation that the untested belt clip has no metal components. Provide SAR data if metal components are present.

No metal included Otherwise it would have been tested.

2) New SAR distribution plots. Please include date, and temperatures.

Temperatures and test dates are included in the result tables.

3) Please update the grant comment to include highest SAR values for both operating frequency bands.

Correction made

4) Second hotspot SAR data. A second hotspot was notated on several plots however the associated SAR value was not located.

The plot are also indicating which spot showed the max values. this pot was measured in detail
