

GETTING STARTED

Thank you for choosing the Smart RGB+IC LED Flow Light Strip by Monster Smart Illuminence. This **Quick Start Guide** will help you with setup and installation of your device.

WHAT'S IN THE BOX

- 16.4ft/5m Smart RGB+IC LED Flow Light Strip with attached controller and preinstalled mounting adhesive
- Mounting Clips + Screws (optional use)
- Quick Start Guide

WHAT DO YOU NEED?

- Smartphone or tablet with Android™ 6.0 Marshmallow or higher / iOS 10 or higher
- Wi-Fi router with an internet connection
- Wi-Fi 2.4GHz 802.11b/g/n
- Rubbing alcohol to clean the installation surface

Before setup, make sure your phone or tablet is connected to the **2.4GHz Wi-Fi network** that your LED Strip will be placed on. For easier pairing, turn on Location and Bluetooth to quickly find nearby devices.

TIP: Do you know your Wi-Fi network name and password? Write it down now if it's hard to remember.

ANYTHING ELSE?

Your LED Light Strip comes with preinstalled mounting adhesive, but you could use the included mounting clips and screws if you would like a more permanent installation. You will need a phillips head screwdriver to install with the clips.

TIP: Save these instructions for future reference.

SETUP COMPLETE SETUP BEFORE INSTALLATION

Remove your LED Strip and all components from the box. It is recommended to first pair your device in a location close to your router BEFORE installation.

NOTE: If desired, you can operate the device with the controller and without pairing to Wi-Fi and without the app. Advanced features like color customization, scheduling, and voice control will not be available. (See "How To Use" on page 5)

STEP 1

Download the **MONSTER SMART** app from the App Store (for iPhone) or Google Play Store (for Android phones).

 **free download**

STEP 2

Make sure your phone or tablet is successfully connected to the **2.4GHz Wi-Fi network** that your device will be placed on and **ensure that your Bluetooth is enabled**.

Open the **MONSTER SMART** app and create an account by following the on-screen instructions.

NOTE: Most Smart devices only work on a **2.4GHz Wi-Fi network**. Many newer home Wi-Fi networks are mixed networks that are set to 5GHz by default. (ie. AT&T Verizon) and you may need to use AP pairing mode to connect. If you still have difficulty, contact your Internet Service Provider for assistance with 2.4GHz network setup.

STEP 3

Connect the USB plug to a powered 5V 2A USB wall adapter (not included) and the light should turn on. If needed, press the multifunction button twice to turn on the light.

Press and hold the multifunction button for 5-6 seconds to enter pairing mode. The light will begin blinking when it has entered pairing mode and is ready to pair.

STEP 4

Confirm that the device is in pairing mode. LED is RAPIDLY blinking.

In the **MONSTER SMART** app, select the "+" in the upper right corner of the home screen to add a new device.

The app will detect the nearby Wi-Fi+BLE enabled device and ask if you would like to add it. Click "Go to add". Ensure that the device is checked and then click the "+" button.

STEP 5

Confirm that the network displayed is your **2.4GHz Wi-Fi network**, then enter your Wi-Fi password and click "Confirm".

NOTE: this may take up to one minute

Once complete, your device will be connected to the network. Confirm or change the settings for your device and then click "Done". Your device is now setup and ready to use!

You can now use the app to add voice control (see pg 8), adjust settings, create custom lighting effects, set schedules, and more!

INSTALLATION

STEP 1

Determine where you will install the LED Strip. Make sure the location is close enough to a power source. Ensure that the mounting surface is smooth and clean.

Clean the mounting surface with a clean cloth and rubbing alcohol to remove any dust or oils that will weaken the adhesive. Be sure to let this surface dry before installation.

NOTE: This adhesive is not recommended for use on unpainted brick, raw wood, uneven/bumpy surfaces, or wallpaper.

STEP 2

Peel off the beginning of the adhesive backing and firmly stick the LED Strip onto the surface. Peel off more of the adhesive backing as you mount the LED Strip, pressing on each section of the strip for 10 seconds as you place it.

TIP: For best mounting results, place adhesive onto the desired surface with ONE attempt. Repositing multiple times will not guarantee secure mounting onto the surface.

OPTIONAL

Using the included mounting clips and screws, and a phillips head screwdriver (not included), install the mounting clips over the LED Strip in equal intervals.

TIP: If desired, you can cut the light strip to shorter lengths by cutting on the designated scissors marks. Note: You cannot connect additional light strips to this product.

STEP 3

Connect the USB plug to a powered 5V 2A USB wall adapter (not included). The LED Strip will automatically reconnect to the paired Wi-Fi network and will now be ready to use!

HOW TO USE

Your LED Light Strip can be easily controlled by the controller, using the **MONSTER SMART** app to access advanced and customizable lighting effects, or by using a compatible voice assistant product (see page 8).

BUTTON CONTROL

POWER: double click - click twice quickly to power on or off your device

SCENES: click - change between preset scenes in Static, Dynamic, Music, and DIY (or access the custom edits of those scenes, requires Wi-Fi pairing and app)

RESET: press and hold - reset the device and to pair to your Wi-Fi network (microphone opening)

APP CONTROL: SCENES

Open the **MONSTER SMART** app and click on your device from the list of available paired devices.

 **Device Info/Settings**

 **EDIT SCENES**

WHITE: Multicolor selector wheel and buttons with brightness adjust

COLOR: Multicolor selector wheel and buttons with brightness adjust

STATIC: Customizable static color scenes with color selectors and brightness adjust. Each Static scene has it's own unique pattern.

DYNAMIC: Flowing multicolor scenes with brightness/speed adjust

MUSIC: Sound reactive multicolor scenes with mic sensitivity adjust

DIY: Customizable flowing multicolor scenes with color selectors, brightness and speed adjust. Each DIY scene has it's own unique flowing pattern. Create and save your favorites!

EDIT SCENES

- RESET:** reset to the default scene settings
- PICTURE:** edit your scene thumbnail
- NAME:** edit your scene name
- COLORS:** add or edit colors and arrange and adjust them as you wish
- SATURATION:** adjust the color saturation
TIP: Saturation 0% = white color
- BRIGHTNESS:** adjust the brightness of the scene
- SPEED:** adjust the color transition speed

GROUPING DEVICES

Your LED Strip is great to use in multiples, you can control each separately or easily group multiple lights together in the app to control them all as one. Click on the settings button in the upper right corner and then click **Create Group** to group your devices.

 **Create Group**

NOTE: Grouping different Monster Smart Illuminence devices with different features may cause communication issues when selecting Scenes. For best results create groups of the same products. If you would like to group together different items, it is recommended to control using the Color settings only, rather than Scenes.
