CHARGING:

1. This product has built in non-removable rechargeable battery, which can be charged by type-C cable.
2. Charging voltage and current is 5V \approx 1A.

3. When the speaker is charged, the red light will be on. As it is fully charged, the lights will be off.

4. Charging the speaker while playing music will speed up the decline of battery life. We suggest use the speaker after fully charged. Repeated charging and discharging will lead to the decline of battery life, which is a normal phenomenon of rechargeable batteries.

WARRANTY STATEMENT:

All products are warranted to be free from defective materials and workmanship. The warranty period for all equipment provided by our company is 12 months after purchase. If you have any questions, please contact a customer service representative for assistance.

FCC WARNING:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
