Subject: Class II Permissive Change FCC ID: EHA-1000CP01UX1

Dear Application Examiner:

Intermec Technologies Corporation d/b/a Honeywell Scanning and Mobility is submitting an application for a Class 2 Permissive Change to permit a new RF exposure condition, in which the radios within Intermec handheld computer Models: 1000CP01U, 1000CP02U, and 1001CP01U (FCC ID: EHA-1000CP01UX1) are co-located with the radios within Intermec's Model: IP30C Handheld RFID Reader.

The IP30C contains Intermec's Model: IM11 RFID radio module (FCC ID: EHA-IM11) and BlueGiga's Model: WT12 Bluetooth radio module (FCC ID: QOQWT12).

The RF exposure condition occurs when the handheld computer interfaces with the IP30C. In this configuration, only hand-held use is possible, so MPE estimates were performed for the co-located radios. In addition to the MPE report that documents compliance for body exposure, extremity SAR for the handheld use condition was evaluated in a separate test report.

No changes have been made to the hardware or software of the radios in these co-located configurations.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

Sean MacKellar
