

ThermPro

Alexa-Enabled Thermometer and Hygrometer

Model No. TP-90

Quick Start

Congratulations on your purchase of a smart, wireless Alexa-enabled indoor Thermometer/Hygrometer. This Alexa-enabled ThermoPro device not only quickly and accurately broadcasts the temperature and humidity of each room, it allows you to be able to conveniently look up historic temperature and humidity readings from any location via an APP installed on your cellphone.

When you ask Alexa the temperature and humidity of a room, Alexa will respond you by announcing the current temperature and humidity retrieved from the device.

Buttons:

Power: Press to turn on/off device.

DIM: Press to adjust the brightness of the LED display.

F/C: Press to switch the temperature unit between Fahrenheit and Celsius.

RESET: Press and hold for 5 seconds to enter EZ or AP pairing modes.

Follow the simple steps below to set up your smart Alexa-Enabled Thermometer/Hygrometer.

You need to install and setup both the Thermo Pro Home APP and Amazon Alexa APP.

Step 1. Search for “Thermo Pro Home” on the Apple Store for IOS devices or on the Google Play Store for Android devices. Download the App and install it on your smartphone.

Step 2: Open the Thermo Pro Home App, and you will be asked to register a Thermo Pro account.

Step 3: Once your account is setup, power on the Thermo Pro thermometer/hygrometer device and follow the instructions in the APP to add the sensors.

Please note:

1. The device can be added via two pairing modes, EZ mode and AP mode. You should try using EZ mode first to add the device. If you have trouble in adding devices using EZ mode, then switch to using AP mode to add the devices.
2. Currently, these devices only support 2.4GHz Wi-Fi network. Do NOT select a 5Ghz Wi-Fi network.

Step 4: You may add as many devices as you wish but ensure you name them different names. For example, you can place one device in the master bedroom and name that device, Master Bedroom. Another device in living room and name that device, Living Room.

Step 5: Search the Google Play Store or Apple App Store for an APP called “Amazon Alexa” and install it onto your smartphone. If your smartphone already has Amazon Alexa APP installed, please skip this step.

Step 6. Open the Amazon Alexa APP and search for the Skill called “Thermo Pro” and ENABLE this Skill. After you press ENABLE, it will ask you to enter your Thermo Pro Home APP account ID and password. If done successfully, “Thermo Pro has been successfully linked” should appear. If you couldn’t successfully link the device,

please go back to the Thermo Pro Skill, press SETTINGS and then press Link Account and enter your Thermo Pro Home APP account ID/password.

Done! Test with the following command “Alexa, ask Thermo Pro, what’s the temperature in the (device’s name)?”

The below is a list of Voice Commands you can ask Alexa:

If you have any questions or need more help with setup, please feel free to contact us:

LIMITED ONE-YEAR WARRANTY

Thermo Pro warrants this product to be free of defects in parts, materials and workmanship for a period of one year, from date of purchase.

Should any repairs or servicing under this warranty be required, contact Customer Service by phone or email for instructions on how to pack and ship the product to Thermo Pro.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
