Sirs,

Please find below the answers to three points justifying the location of the label when the label is placed in the battery compartment:

- a. Provide justification such as limited space:
The available label area on the device is limited because it is relatively small.
- b. How the FCC identifier and ISED number or label will be readily viewable:
The batteries are designed for easy removal and the label will be visible whenever the batteries are removed for replacement.
- c. How the FCC identifier and ISED number or label will be readily viewable at the time of the purchase:
The label will be readily visible at the time of purchase because the device will be marketed without the battery installed.
