ASRC-L**

HAILEA®
SINCE 1989

REQUIRED

- Adequate Wi-Fi coverage reaching to the unit (2.4 GHz networks supported)
- Aquascape Smart Control App (available on iOS or Android App Store)

Safety Information

WARNING: It is recommended whenever working in or near water to have all electrical devices plugged into a ground fault interrupter (GFCI) that has been installed by a licensed electrician.

- The power cable should be protected at all times to avoid punctures, cuts, bruises, and abrasion.

IMPORTANT: Aquascape, Inc. is not responsible for losses, injury, or death resulting from a failure to observe these safety precautions, misuse or abuse of pumps or equipment.

Installation

- Mount the receiver above the ground on a post, fence, or wall (Ex. 1).
- Connect the pump to the Smart Control Receiver.

NOTE: If connecting a previous generation of the Adjustable Flow Pump, please use the included Conversion Plug (Ex. 2).

- Plug the Smart Control Receiver into an outdoor rated GFCI, and the unit will automatically enter pairing mode (Ex. 1).

Ex. 1

Ex. 2

NOTE: The blinking blue light on the face of the unit indicates the receiver is in pairing mode and ready to be connected.

- Download the Aquascape Smart Control App (available on iOS or Android App Store).
- Open the Aquascape Smart Control App and click 'Create New Account'.

NOTE: If you already have an account, login with your username and password.

- Once logged in, click the three dashes in the upper right-hand corner of the home screen (Ex. 3).
- Click 'Add New Device' (Ex. 4).
- Enter the Wi-Fi network and password for the network to which the unit will connect (Ex. 5).

NOTE: Adequate Wi-Fi coverage is required (2.4 GHz networks supported).

- Continue to follow on-screen instructions to complete the pairing process.
- To reset the device to factory defaults, first turn the unit off by pressing the power button, then press and hold the + and - buttons for four seconds and release when the LED display lights up completely (Ex. 6).
- The receiver includes a switch that allows the pump to be operated in the two following modes (Ex. 7).
 - ☒ Position 1 - Operated by Aquascape Smart Control App or remote control
 - ☐ Position 2 - Bypass control, and operate at full flow-rate
- In the event of a power loss the pump will revert to the last flow-rate setting.

Troubleshooting

- Device won't pair
 - Make sure the outlet is receiving power
 - Make sure you have adequate wireless coverage to connect the device (2.4 GHz networks supported)
 - Reset the device to factory defaults
 - Make sure the ground-fault circuit interrupter (GFCI) is not tripped

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

☐ MPE caution (for mobile device under Part 15.247 & 15.407 device)

To satisfy FCC RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of this device and persons during device operation. To ensure compliance, operations at closer than this distance is not recommended
