Кеу	Illustrate
Power	On/Off, power on after press 3 seconds; power off after press 3 seconds
WPS	On/Off, enable/disable the WPS function of Wi-Fi after press 3 seconds
Reset	Software reset after short click Reload to default settings after press 6 seconds Hardware reset after press 12 seconds

## **LED Indication**

Indicator	Working status
WiFi LED	Blue light active for Wi-Fi enabled Blue light flash quickly for the WPS function is enabled
	Off for Wi-Fi disabled
Signal LED	Blue light active for 2G/3G/4G network registered
	Red light active for 2G/3G/4G network not registered
	Blue light flash slowly for data connection established
Battery LED	Red light active for battery low without charging
	Purple light flash for battery charging
	Blue light flash for battery changing full
	Blue light active for battery normal state

# Installation

Follow the diagram to install the SIM card.

Tips: Always switch the device off and disconnect the charger before removing the SIM card.

1. Remove the back cover.

2. Insert the SIM card. Ensure that the contact area on the card is facing down and that the beveled corner on the card is facing the beveled corner on the holder.

3. Finally cover the back.

## Charge

Your battery has been partially charged at the factory. If the device indicates a low charge, do the following:

- 1. Connect the charger to an outlet.
- 2. Connect the USB charger plug to your device"s USB port.

3. When the device indicates a full charge, disconnect the charger from the device, then from the outlet.

#### One : Using charge adapter

#### Two: Using USB port

# TD0301 Usage

TD0301 supports 4G/3G/2G networks. Insert the SIM card, Wi-Fi devices and the computers can access the Internet through TD0301, enjoy high-speed network services. Smart phones, tablet computers, game consoles and other Wi-Fi devices can be connected with the TD0301 Wi-Fi connection for Internet access.

Computers & laptops etc. may be connected to the TD0301 via USB cable for Internet Access.

TD0301 connects computer via a USB cable for the first time, you need to follow the prompts.

In order for a Wi-Fi device to establish a connection with the TD0301 for the first time, you will need to select the TD0301SSID (Wi-Fi name) & enter the relevant Wi-Fi password, which you may find them in the following ways:

#### Method one: on the nameplate view the default SSID and Wi-Fi password

#### Method Two: Login management page view

- 1. On computer, open your browser, input http://192.168.0.1 and enter.
  - •The default Account is admin
  - •The default Password isadmin

Enter the Account and Password, login the administration pages

<ul> <li>(a) (a) (b) (b) (b) (b) (b) (b) (b) (b) (b) (b</li></ul>	
	COR.
	Logis

2.Enter the Wi-Fi menu, view the default SSID and Wi-Fi password

	1 🗈 📾 🖬 😟	s = =	
• mm • inn • inner			

**★**Recommend that you start using TD0301 administration pages after setting a convenient

landing memorizing SSID and a higher safety factor Wi-Fi passwords.

# Install the driver and connecting the device

#### USB Connection:Windows 10 for example

- 1. Keep TD0301 powering on, Plug the device into your computer, it will install the default RNDIS driver automatically.
- 2. Check the network card is installed correctly,like the following pictures

yanta • Dalila Haradania daniar Marad Kanada cala anging pat	Degeneral file conversion Research for conversion New Yorkson Conversion Statement Relation of the Statement Stateme	Henork Jakger Weett

Establish Wi-Fi connection:you must ensure that the computer equipped with a wireless network card. If the computer showed the presence of Wi-Fi connectivity, the wireless LAN is available. Otherwise, you need to check your wireless network card is working properly. In the Wi-Fi list, select the SSID consistent with TD0301 Wi-Fi, click Connect. Then enter the correct Wi-Fi password, click ok. A moment later, Wi-Fi connection is displayed next to the name, Wi-Fi connection is successful.

1. Enter the correct Wi-Fi password, click Next

2. After a moment, the prompt "Connected" is displayed below the name, it means the

connection is established.

# 3. Wi-FiMAC Filter

Wireless MAC filter allows you to control packets from devices with specified MAC address in

your Wireless LAN.

C. & house the second test		
	🔹 🖬 🖷 😫 🗮 🧮	

You can enable or disable this function onthis page.

•Accept Mode:It only allows the devices in the list to connect to the router.

• **Reject Mode:** The devices which mac addressin the filter list will be prohibited connect to the

TD0301.

# 4. ClientList

This page displays the currently connected clients and their respective MAC addresses in the list.

# • LAN

## 1.LAN IP

This section allows you to configure the local network settings of your router.

· · · · · · · · · · · · · · · · · · ·		

• **IP** Address: The IP address of router.

• Subnet Mask: The subnet mask for router.

•Domain Name: You can specify a domain name for router to instead of IP address to login this management UI.

## 2.DHCP Server

**DHCP** (Dynamic Host Configuration Protocol) is a protocol for the automatic configuration used on IP networks. The DHCP server can assign each client an IP address and informs the client of the of DNS server IP and default gateway IP.

If this function is enabled, you can assign the range of IP pool and lease time for client, and the DNS server address.

You also can assign the IP address for client manually.

		And the second second	

## **3.IP Filter**

IP Filter blocks the LAN to WAN packet exchanges and restricts devices from using specific network services.

For example, if you do not want the device to use the Internet service, key in 80 in the destination port. The traffic that uses port 80 will be blocked (but https cannot be blocked).

Leave the source IP field blank to apply this rule to all LAN devices.

Black List Duration: During the scheduled duration, clients in the Black List cannot use the specified network services. After the specified duration, all the clients in LAN can access the specified network services.

White List Duration: During the scheduled duration, clients in the White List can ONLY use the specified network services. After the specified duration, clients in the White List and other network clients will not be able to access the Internet or any Internet service.

NOTE: If you set the subnet for the White List, IP addresses outside the subnet will not be able to access the Internet or any Internet service.

## 7. Device Information

This page can view related equipment information.

#### Warning

• Please only use original accessories provided with purchase. Use of unauthorized chargers or other accessories may cause damage to the device and can result in fire, explosions, or other hazards.

• Please keep the device in a dry and cool environment and do not let the device come into contact with water. Extreme high or low-temperatures may cause damage to the device.

 $\cdot$  Please do not expose the device to high temperature environments or heating,

such as strong sunlight, heaters, microwaves, ovens, or water-heaters etc.

An overheated battery might cause explosion.

· When charging is complete or the device is fully charged, please disconnect the

charger from the device and unplug the charger from the power outlet.

• The built-in battery is non-removable. Please do not attempt to change or disassemble the battery by yourself. This may result in damage to the battery or the device. The battery can only be replaced by an official authorized service provider.

- Notice: Using the wrong model of battery may result in an explosion. Please make sure to dispose of used batteries as instructed.
- Device Working Temperature: The device should be kept at a working temperature of 0°C to 35°C. For the user's safety, please avoid using the device in a high-temperature environment for long periods of time, as this leads a shorter device lifetime. The device will stop charging automatically when the battery temperature reaches 45°C, and shut down automatically when battery temperature is more than 55°C.
- We are only responsible for the function of the device' s official operating system and update system. The use of any other systems or software from unofficial third parties might cause security risks.

#### **FCC Statement**

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- —Reorient or relocate the receiving antenna.
- —Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- —Consult the dealer or an experienced radio/TV technician for help.
   Any Changes or modifications not expressly approved by the party responsible for compliance could void theuser's authority to operate the equipment.

#### **FCC Radiation Exposure Statement**

- This device complies with FCC SAR exposure limits set forth for an uncontrolled environment. SAR compliance for using the equipment in close proximity to the human body has been evaluated at 5mm. This equipment must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and consider removing the no-collocation statement.
- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference, and
  - (2) This device must accept any interference received, including interference that may cause undesired operation.
