SUBJECT: Permissive Change Request for Inventek FCC ID: O7P-341 and IC: 10147A-341

Timco:

The Inventek Module bearing the FCC ID and IC numbers referenced above, is going to be used in a host which is worn next to the body, so SAR Data and report are being submitted as proof that the module meets requirements under these circumstances. No changes have been made to the module itself, and the installation of the module into the host does not affect the original compliance information and test report data submitted.

Best Regards,

A handwritten signature in black ink, appearing to read 'Sandi McEnery', is positioned above the typed name.
