Mike,

Thank you for your feedback on the OVFKWC-KX2 applications that have been submitted.

I have investigated the issues and have attached a file with the responses to your questions.

Please note that the response to question 1 involves an explanation of the product's proprietary Parts List and Schematic. It is requested that the response to this question be made confidential.

Please let me know if you have any further questions or concerns.

Thank you again for your help.

Patrick Bowen

Question #1: Please provide detail information on the alternate components as the reasons for this Class II permissive change. What is the original / Changed manufacturer name, model name, and PCB location .

Question #2: What is DASY 4 system setting on Secondary Peak investigation? Some of plots have secondary peak with additional readings but some of secondary peak did not investigate.

FYI : In the future submission, please improve SAR plots images. Some of information on the SAR plots can not be read clearly.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can

1/19/2005

continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
