This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirements, the device can be used in portable exposure conditions without restriction

2. If other software such as mobile manager is installed in the user's mobile phone, in order to ensure the normal operation of background APP, please turn on the push notification and allow the background operation permission on the mobile phone, otherwise the notification cannot be pushed.

3. Charging requirements: use the charger with the specification of 5V 0.5~1A for charging. Please use a dedicated charging line for charging. After charging, unplug the data cable from the charger to avoid short-circuit hazard caused by adsorption on metal. If you don't use it for a long time, please turn it off and recharge it once every month.

Appendix

Basic parameter

Master control chip	RTK8762
Data transmission	BLE 5.0
Battery type	Polymer lithium battery
Battery capacity	150mAh
Charging voltage	5.0V
Working temperature	-5~45
Waterproof	Daily waterproof
