Key Features and Benefits

20 MP | SONY 1-Inch CMOS | Super-Wide 133° Horizontal Field of View

20 MP camera with SONY 1-inch CMOS brings UHD 4K video conference with delicate details. With super-wide 133° horizontal field of view, everyone in the conference can be seen without adjusting the camera. Moreover, the image brightness can be automatically optimized even in a dim or backlight environment, ensuring the participant faces can be seen clearly.

Sound Localization for Full-Duplex Mode

Eight MEMS microphone arrays make MeetingEye 400 have stronger ability of noise proof and dereverberation. The new upgraded Beamforming algorithm, together with the technology of post-processing on acoustic echo cancellation and the dereverberation algorithm, brings high quality full-duplex call and realizes more precise voice pickup.

Smart Video Conferencing with AI Technology

Featuring AI technology, including Auto Framing, Sound Localization, and Speaker Tracking, MeetingEye 400 can not only automatically adjust the image size according to the number and position of the participants, but also automatically zoom the speaking participants without adjusting the camera, making the participants more focus on the conference.

Secure Conference with Auto Camera Privacy Shutter

The camera privacy shutter automatically opens when the video conference starts and remains close when not having video conferences. The lens status is visible at a glance, eliminating "lens anxiety" in daily conferences.
