Security screw for metal collar

Mounting screws

Cable clips

Cable clip screws

Tools needed

For optimal motion detection:

Remove protective film from device.

This ensures your device works properly

Your camera can be mounted on an outdoor wall,

Choose a location close to an outlet.

Make sure your camera is positioned close enough to an outlet for the length of the

included power cable.

eave, or overhang.

Mount the camera about 3 feet (1 meter) from the middle of the entry point, and about 10 feet (3 meters) above the ground.

If installing on a wall...

Your camera comes ready to mount, with the ball joint pointing down. No adjustments are needed before installation.

If installing on an eave or overhang...

Remove the battery compartment cover by twisting it counterclockwise and insert the ball joint plate with the ball joint pointing up.

Remove the mounting plate.

Slide it down to remove it from the camera mount.

Install the mounting plate.

For wall installation, the **UP** arrow should point up. For an eave or overhang, the arrow should point toward the area you want to monitor for motion.

If installing on a wood surface, screw the plate directly into the wall.

If installing on a masonry surface, mark four screw holes using the plate as a guide.

Drill pilot holes using a 1/4" drill bit. Insert the included wall anchors, then drive the four mounting screws through the mounting plate into the wall anchors.

WARNING!

Only use the included mounting screws when securing the mounting plate.

CAUTION! DO NOT drill into your home's electrical wiring.

Attach the camera mount.

Then, tighten the security screw.

Slide it onto the mounting plate.

Loosen the metal collar on the camera mount

using a Phillips-head screwdriver (not included).

Push the ball joint into the socket until it snaps into place.

Attach your camera to the camera mount.

Plug the power adapter into your camera.

Insert the USB-C end of the power adapter into

the back of your camera.

Turn on your camera.

Plug the power adapter into a power outlet.

Adjust the camera angle.

Rotate the camera to focus on the area of your choice. Look at Live View in the Ring app to make sure it's positioned at your desired angle.

Tighten the security screws.

Tighten the security screw on the metal collar to secure the camera position.

Then, tighten the security screw on the bottom of your camera to secure the battery compartment.

Secure the power cable.

Use the provided cable clips to secure the cable on your wall.

Use a 1/4" drill bit to pre-drill holes in the wall and insert the provided anchors first if installing on a masonry surface, like stucco or brick.

The power cable can be painted to match your wall.

Secure the adapter.

Secure the power adapter to the wall with the included mounting screws.

*Your free trial isn't applicable for locations with an existing Ring Protect subscription. See ring.com/protect-plans to learn more about your plan's retention period.

Free Ring Protect Plan for 30 days.

Your new device comes with a free, 30-day trial of **Ring Protect**. This comprehensive subscription service lets you review, save, and share your video and photo history anytime so you never miss a moment.*
