Re: HN2EASYLAN

To whom it may concern,

Intermec Technologies Corp. hereby declares that the EasyLAN 501XP and EasyLAN 601XP are of the same family series. The difference between the two model numbers is limited to the print head dot size, the larger of which (EasyLAN 601XP) was tested and found to be compliant. There are no software or hardware differences between the two models. All Intermec Technologies EasyLAN RF Print Servers incorporate the same transceiver (FCC ID: HN2EASYLAN). Please feel free to contact me, if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cheryl D. White'.

Cheryl D. White
EMC Engineer
