Dear Hilton

In support of an application for a Class II Permissive change to Intermec Technologies Corporation 700C pen-notepad computer - Mobile Grant - FCC id: EHA700C-SMC45

This product is used in portable data collection and communication applications for material tracking and inventory control in market segments such as route delivery and warehousing. The 700C can have up to all three radio options installed simultaneously and has been previously approved as a mobile device under FCC id: EHA700C-SMC45.

Intermec have added a new antenna option; Mobilemark 1/4 wave monopole 805-606-204 (GSM/GPRS). This application is for a Permissive Change to the 700C mobile Grant by BABT acting as a TCB.

An EMC report referring to FCC Pt24 and Pt 15C spurious emissions and ERP tests with the 1900MHz GPRS and 802.11b radios transmitting simultaneously will be forwarded from Michelle Hardy shortly to complete the application documentation.

If you require any further information please do not hesitate to contact me. Please do not invoice Intermec directly as this is part of a larger project.

Yours sincerely

Phil Dolling
Compliance Manager
