Solder Board-Component View 3	 A photograph showing a small green printed circuit board (PCB) component with three soldered pins. Three wires (red, green, and white) are connected to the component. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 20 mm marks.
Solder Board-Component View 4	 A photograph showing the same green PCB component from a different angle. The component is still on the blue textured surface next to the black ruler. The wires (red, green, and white) are visible, and the component is positioned between the 10 mm and 20 mm marks on the ruler.

Solder Board-Component View 5	 A photograph showing a small green printed circuit board (PCB) component with three wires (red, white, and green) soldered to it. The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters. The ruler on the left is oriented vertically with markings from 0 to 60 mm. The ruler on the bottom is oriented horizontally with markings from 0 to 80 mm.
Solder Board-Component View 6	 A photograph showing a small gold-colored PCB component with three wires (red, white, and green) soldered to it. The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters. The ruler on the left is oriented vertically with markings from 0 to 60 mm. The ruler on the bottom is oriented horizontally with markings from 0 to 80 mm.
