# 716Wh Portable Power Station

User Manual Please read this manual before use and follow its guidance. Keep this manual for future reference.

User Manual

## FREQUENTLY ASKED QUESTIONS

A Dry, non-abrasive cloths to wipe will be perfect. The power station is a versatile tool for various adventures, simple cleaning would be required from time to time to keep the unit in a good condition.

A Please place the power station in a dry and cool place at the recommended temperature. Do not expose the power station to humid environment. If you want to store it for a long time, please charge the battery to 80% every 6 months to extend the battery lifetime. Remind to turn off the unit before storing.

### 3 How do I know whether my device will work with the power station?

A Step1: You need to figure out the amount of power your devices require. Some research may be taken on internet search or the user guide of your device shall suffice.

Step 2: Check the rated power of certain port on power station. For example, if the AC output port generates 700W of power and your device requires over 700W for a extended period of time, the power station will turn itself off.

Consult the dealer or an experienced radio/TV technician for help.

his equipment complies with FCC radiation exposure limits set forth for an uncontrolle ronment. This equipment should be installed and operated with a minimum distance of 20

articular installation.

C Radiation Exposure Statement

n between the radiator and your body

A Please place your after-sale requirement as the warranty card written to the platform where you order

FCC warning: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired peration. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio ommunications. However, there is no guarantee that interference will not occur in nis equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to to correct the interference by one or more of the following measures: -- Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
