Subject: Attestation concerning control of radio module installation process

FCC ID: 2ALZB-AW276

To whom it may concern

We, SECO S.p.A. hereby attest that we will be installing all units of our AWCM276-DMV radio module, FCC ID: 2ALZB-AW276, into our own host product as defined within this Class 2 Permissive Change application i.e. the PC-Gateway SYS-C31-DMV.

SECO S.p.A. will, therefore, retain full control of the AWCM276-DMV radio module installation process and ensure host compliance.

SECO S.p.A. Quality Control will perform regular spot checks on the installation process of the radio modules into SECO host SYS-C31-DMV to ensure correct installation and, therefore, continued compliance with the FCC rules and ISED standards.

SECO S.p.A. further attest that the AWCM276-DMV radio module is only approved for use in this SECO host product and not intended for sale to third-parties. The module integration instructions are SECO internal confidential manufacturing documents.

Furthermore these module integration instructions are to be held permanently confidential as an Operational Description exhibit as allowed by KDB 996369 D03 OEM Manual section 2.1.

Yours faithfully,

Alessandro Pali
