

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment with a digital display and various knobs is placed on a light-colored wooden table. A red cable is connected to the equipment. On the floor next to the table is a power supply unit with a red terminal. A power strip is visible on the wall behind the equipment. To the right, another wooden table is partially visible.
Radiation Emission Test View (30MHz to 1GHz)	 A photograph showing a radiation emission test setup. A white, box-like test chamber is positioned in the center of a room. The walls are covered with white, square-shaped electromagnetic interference (EMI) shields. The floor is a polished, reflective surface with yellow and black diagonal safety stripes. To the right, a metal frame structure is visible.

Radiation Emission Test View (Above 1GHz)	 A photograph of a radiation emission test setup. A white, rectangular test object is placed on a white, U-shaped stand in the center of an anechoic chamber. The walls, floor, and ceiling are covered with white, square-shaped absorbers. A red, curved object is visible on the right side of the chamber. The floor is dark and has a yellow line marking.
Radiation Emission Test View (Above 18GHz)	 A photograph of the same radiation emission test setup as above, but for a higher frequency range. The test object and stand are in the same position. A blue cable is visible on the right side of the chamber. The floor is dark and has a yellow line marking.
