McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a limited modular approval of a "Portable" intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This approval is for a Wireless Device Server (MN: WBX2100, FCC ID: R68WIIBATT), which is a Wireless Embedded Device Server that provides a network-enabling solution based on the IEEE 802.11b wireless standard. WiBatt allows Original Equipment Manufacturers (OEMs) to add wireless connectivity to their products by incorporating it onto a circuit board. For this submission the end product will be installed in a manner in which the transmitting antenna may be any distance from the human body. The configuration tested for this submission was with a Wanshih (PN: WSS002) antenna continuously transmitting and receiving from the antenna port.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Rick Candelas
