

Exhibit 11: RF Exposure/Environmental Evaluation

Section 15.247 (b)(4)

Requirement:

Spread spectrum devices shall be operated in a manner that ensures that the public is not exposed to radio frequency energy levels in excess of the Commission's guidelines. See § 1.1307(b)(1) and 2.1093 of this chapter. All equipment shall be considered to operate in a "general population/uncontrolled" environment. Applications for equipment authorization of devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions. Technical information showing the basis for this statement must be submitted to the Commission upon request.

Demonstration of Compliance:

The Satellite Pro 4600 is classified as a portable device, which is designed so that a minimum separation distance of 5.0 centimeters is maintained between the transmitter's radiating structure and the body of the user or nearby persons, and it does not operate in the one of the services listed in § 2.1093(c). Therefore, the Satellite Pro 4600 is categorically excluded from routine environmental evaluation for RF exposure as per § 2.1093(c).

The user's manual contains a warning statement that instructs the user that the 5.0 centimeter separation distance must be maintained in order to comply with the RF exposure requirement.

Sample of RF Exposure Statement:

Caution: Exposure to Radio Frequency Radiation.

The radiated output power of the **Toshiba Wireless LAN Mini PCI Card** is far below the FCC radio frequency exposure limits. Nevertheless, the **Toshiba Wireless LAN Mini PCI Card** shall be used in such a manner that the potential for human contact during normal operation is minimized. When using this device in combination with Wireless LAN Outdoor Antenna products, a certain separation distance between antenna and nearby persons has to be kept to ensure RF exposure compliance. The distance between the antennas and the user should not be less than 5.0 cm. Refer to the Regulatory Statements as identified in the documentation that comes

with those products for additional information.

The Toshiba Wireless LAN Mini PCI Card is far below the FCC radio frequency exposure limits.

Nevertheless, it is advised to use the Toshiba Wireless LAN Mini PCI Card in such a manner that human contact during normal operation is minimized.
