PY7-93060R Data Reuse Justification and Summary

To Whom It May Concern:

We are applying data reuse for the variant model FCC ID PY7-93060R based on the parent model FCC ID PY7-58692W.

Regarding WLAN/Bluetooth/WPT, both models share the same PCB layout, antennas, and components. The unlicensed band data for the parent model remains representative for the variant model (equipment classes DSS, DTS, NII, DFS and DCD) and test reports for the parent model plus test reports with the spot check data for the variant model have been submitted. The power to be listed on the F-731 and FCC grants for these bands are the values detailed in the parent reports as the spot check data shows all values within expected tolerances of the parent model.

For RF Exposure, WPT RF Exposure data are referenced from the parent model FCC ID: PY7-58692W and are leveraged to cover the variant FCC ID: PY7-93060R. The variant model SAR report has full tested data for both the licensed bands and WLAN/Bluetooth.

FCC ID	Bluetooth DSS	Bluetooth DTS	802.11 DTS	802.11 NII	DFS	WPT DCD	WPT RF Exposure

	Indicates full set of test data. Values in this report to be listed on the grant for these bands.						
	Partial test data used to confirm that the parent model data is representative for the variant model. Data for these bands is for reference only
