Reminder

When you turn on the computer for the first time, please do not connect it to Ethernet or connect to Wi-Fi, this can avoid some settings to make this computer enter Windows faster.

The update of Windows will take some time, please wait patiently for the process to be completed; please do not cut off the power during the process to prevent damage to system files and your files.

If you need to use the USB Type-C port to connect a monitor, please connect the monitor to your BMAX device before powering on your BMAX device.

Manage display language settings in Windows

The display language you select changes the default language used by Windows features, such as Settings and File Explorer.

1. Select the Start button > Settings > Time & Language > Language.

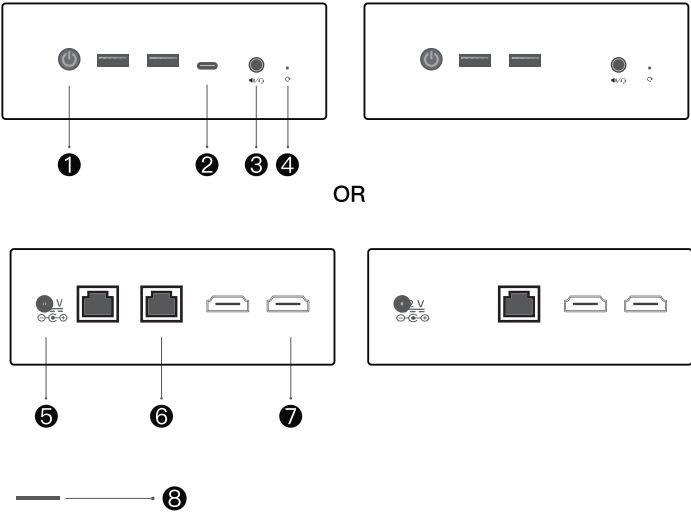

2. Choose a language from the Windows display language menu, or, under Preferred languages, select Add a language to install the one you want if it isn't listed.

When you first turn on your computer, don't connect it to Ethernet or Wi-Fi, the system can avoid certain settings to get your computer into Windows faster.

Windows upgrade takes a while, please wait patiently for the process to complete, during this process, please do not turn off the power to avoid damaging system files.

If you need to connect the monitor using the USB Type-C port, please connect the monitor to the BMAX before turning on the BMAX device.

## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
