

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On the left is the black plastic housing, which is open to reveal the internal electronic board. To the right of the housing is the internal board, which is populated with various electronic components including a microcontroller, capacitors, and a small display. A yellow measuring tape is placed horizontally below the components to provide a scale reference. The background is a light-colored, textured surface.
Solder Board-Component View 1	 A close-up photograph of the electronic board component, showing the soldered connections and various electronic components. The board is populated with a microcontroller, capacitors, and a small display. A yellow measuring tape is placed vertically to the left of the board to provide a scale reference. The background is a blue textured surface.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 5	 A photograph of a white printed circuit board (PCB) populated with various electronic components, including a large black integrated circuit, several resistors, capacitors, and a small green PCB mounted on it. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. A date stamp "2023/10/0" is visible on the board.
