

# Test Report

## FCC Part15 Subpart C & RSS 247 Issue2

Product Name : Parrot Camera FPV  
Model No. : Camera FPV  
FCC ID : 2AG6ICAMFPV  
IC : 21053-CAMFPV

Applicant : PARROT DRONE SAS

Address : 174 Quai de Jemmapes Paris France 75010

Date of Receipt : Jul. 13th, 2017  
Test Date : Jun. 13th, 2017~ Jul. 13th, 2017  
Issued Date : Sep. 01st, 2017  
Report No. : 1772069R-RF-US-P06V01  
Report Version : V1.3

The test results relate only to the samples tested.

The test results shown in the test report are traceable to the national/international standard through the calibration of the equipment and evaluated measurement uncertainty herein.

This report must not be used to claim product endorsement by TAF or any agency of the government.

The test report shall not be reproduced without the written approval of DEKRA Testing and Certification (Suzhou) Co., Ltd.

# Test Report Certification

Issued Date : Sep. 01st, 2017

Report No. : 1772069R-RF-US-P06V01

Product Name : Parrot Camera FPV  
Applicant : PARROT DRONE SAS  
Address : 174 Quai de Jemmapes Paris France 75010  
Manufacturer : GoerTek Inc.  
Address : NO 268 DONGFANG NEW&HIGH-TECH INDUSTRY  
DEVELOPMENT ZONE WEIFANG,SHANDONG 261031  
Model No. : Camera FPV  
FCC ID : 2AG6ICAMFPV  
IC : 21053-CAMFPV  
EUT Voltage : DC 3.3V  
Test Voltage : AC120V/60Hz  
Brand Name : Parrot  
Applicable Standard : FCC CFR Title 47 Part 15 Subpart C: 2015  
ANSI C63.4:2014; ANSI C63.10:2013;  
KDB 558074 D01v04  
RSS GEN: Issue 4  
RSS247: Issue 2  
Test Result : Complied  
Performed Location : DEKRA Testing and Certification (Suzhou) Co., Ltd.  
No.99 Hongye Rd., Suzhou Industrial Park, Suzhou, 215006,  
Jiangsu, China

## 1. General Information

### 1.1. EUT Description

|                    |                                                                 |
|--------------------|-----------------------------------------------------------------|
| Product Name       | Parrot Camera FPV                                               |
| Model No.          | Camera FPV                                                      |
| EUT Voltage        | DC 3.3V                                                         |
| Test Voltage       | AC120V/60Hz                                                     |
| Frequency Range    | For 2.4GHz Band<br>802.11b/g: 2412~2462MHz                      |
| Channel Number     | For 2.4GHz Band<br>802.11b/g: 11                                |
| Type of Modulation | 802.11b: DSSS<br>802.11g: OFDM                                  |
| Data Rate          | 802.11g: 6/9/12/18/24/36/48/54 Mbps<br>802.11b: 1/2/5.5/11 Mbps |
| Channel Control    | Auto                                                            |

### 1.2. Working Frequency of Each Channel:

| 802.11b/g Working Frequency of Each Channel: |           |         |           |         |           |         |           |
|----------------------------------------------|-----------|---------|-----------|---------|-----------|---------|-----------|
| Channel                                      | Frequency | Channel | Frequency | Channel | Frequency | Channel | Frequency |
| 01                                           | 2412 MHz  | 02      | 2417 MHz  | 03      | 2422 MHz  | 04      | 2427 MHz  |
| 05                                           | 2432 MHz  | 06      | 2437 MHz  | 07      | 2442 MHz  | 08      | 2447 MHz  |
| 09                                           | 2452 MHz  | 10      | 2457 MHz  | 11      | 2462 MHz  | N/A     | N/A       |

### 1.3. Antenna information

|                      |                                     |           |                                     |                                                   |                          |           |
|----------------------|-------------------------------------|-----------|-------------------------------------|---------------------------------------------------|--------------------------|-----------|
| Antenna manufacturer | N/A                                 |           |                                     |                                                   |                          |           |
| Antenna Delivery     | <input checked="" type="checkbox"/> | 1*TX+1*RX | <input type="checkbox"/>            | 2*TX+2*RX                                         | <input type="checkbox"/> | 3*TX+3*RX |

| Antenna Gain         | -0.2dBi                             |           |                                     |                                                   |                          |           |

## 1.4. Mode of Operation

| Test Modes List             |
|-----------------------------|
| Mode 1: Transmit by 802.11b |
| Mode 2: Transmit by 802.11g |

## 1.5. Tested System Details

The types for all equipments, plus descriptions of all cables used in the tested system (including inserted cards) are:

| No. | Product   | Manufacturer | Model No.      | Serial No. | Power Cord         |
|-----|-----------|--------------|----------------|------------|--------------------|
| 1   | Notebook  | Lenovo       | Think pad x220 | SUA0600195 | Non-shielded       |
| A   | LAN cable | N/A          | N/A            | N/A        | Non-shielded, 1.5m |

## 1.6. Configuration of Tested System

Test setup Diagram- Radiated Emission

### **1.7. EUT Exercise Software**

|   |                                                                                                        |
|---|--------------------------------------------------------------------------------------------------------|
| 1 | Setup the EUT and simulators as shown on above.                                                        |
| 2 | Turn on the power of all equipment.                                                                    |
| 3 | Run the RF test software, and set the test mode and channel, then press OK to start continue Transmit. |

## 2. Technical Test

### 2.1. Summary of Test Result

#### For FCC:

| Performed Test Item                         | Normative References                                          | Limit                          | Result |
|---------------------------------------------|---------------------------------------------------------------|--------------------------------|--------|
| AC Power Line Conducted Emission            | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.207       | FCC 15.207                     | N/A    |
| Emissions in restricted frequency bands     | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.209       | FCC 15.209                     | PASS   |
| Emissions in non-restricted frequency bands | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.247(d)    | $\geq 20\text{dBc}$            | PASS   |
| Radiated Emission Band Edge                 | FCC CFR Title 47 Part 15 Subpart C: 2015 15.247(d)            | FCC 15.209                     | PASS   |
| Occupied Bandwidth                          | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.247(a)(2) | $\geq 500\text{kHz}$           | PASS   |
| Fundamental emission output power           | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.247(b)(3) | $\leq 30\text{dBm}$            | PASS   |
| Power Spectral Density                      | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.247(e)    | $\leq 8\text{dBm}/3\text{kHz}$ | PASS   |
| Antenna Requirement                         | FCC CFR Title 47 Part 15 Subpart C: 2015 Section 15.203       | FCC 15.203                     | PASS   |

**For IC:**

| Performed Test Item                         | Normative References                                                                    | Limit                          | Result |
|---------------------------------------------|-----------------------------------------------------------------------------------------|--------------------------------|--------|
| AC Power Line Conducted Emission            | RSS-Gen Issue 4 November 2014<br>Section 8.8                                            | RSS-Gen                        | N/A    |
| Emissions in restricted frequency bands     | RSS-247 Issue 2 Feb 2017<br>Section 5.5                                                 | RSS-247                        | PASS   |
| Emissions in non-restricted frequency bands | RSS-247 Issue 2 Feb 2017<br>Section 5.5                                                 | $\geq 20\text{dBc}$            | PASS   |
| Radiated Emission Band Edge                 | RSS-Gen Issue 4 November 2014<br>Section 8.10                                           | RSS-Gen                        | PASS   |
| Occupied Bandwidth                          | RSS-Gen Issue 4 November 2014<br>Section 6.6<br>RSS-247 Issue 2 Feb 2017<br>Section 5.2 | $\geq 500\text{kHz}$           | PASS   |

| Power Spectral Density                      | RSS-247 Issue 2 Feb 2017<br>Section 5.2                                                 | $\leq 8\text{dBm}/3\text{kHz}$ | PASS   |
| Antenna Requirement                         | RSS-Gen Issue 4<br>Section 8.3                                                          | RSS-Gen Issue 4                | PASS   |

**2.2. Test Frequency configuration:**

| Modulation Mode | Channel | Frequency | Channel | Frequency | Channel | Frequency |
|-----------------|---------|-----------|---------|-----------|---------|-----------|
| 802.11b         | 01      | 2412 MHz  | 06      | 2437 MHz  | 11      | 2462MHz   |
| 802.11g         | 01      | 2412 MHz  | 06      | 2437 MHz  | 11      | 2462MHz   |

### 2.3. Power setting parameter

| Modulation Mode | Test Frequency | Ant |
|-----------------|----------------|-----|
| 802.11b         | 2412           | 2F  |
|                 | 2437           | 2F  |
|                 | 2462           | 2F  |
| 802.11g         | 2412           | 22  |
|                 | 2417           | 2B  |
|                 | 2437           | 2F  |
|                 | 2457           | 2D  |
|                 | 2462           | 2D  |

## 2.4. Power vs Data Rate

| MCS Index<br>for 802.11n | Spatial<br>Streams | Data Rate (Mbps) |         |     |                 |          |                 |          |
|--------------------------|--------------------|------------------|---------|-----|-----------------|----------|-----------------|----------|
|                          |                    | 802.11b          | 802.11g |     | 20MHz Bandwidth |          | 40MHz Bandwidth |          |
|                          |                    |                  |         |     | 800ns GI        | 400ns GI | 800ns GI        | 400ns GI |
| 0                        | 1                  | 1                | 6       | --- | 6.5             | 7.2      | 13.5            | 15.0     |
| 1                        | 1                  | 2                | 9       | --- | 13.0            | 14.4     | 27.0            | 30.0     |
| 2                        | 1                  | 5.5              | 12      | --- | 19.5            | 21.7     | 40.5            | 45.0     |
| 3                        | 1                  | 11               | 18      | --- | 26.0            | 28.9     | 54.0            | 60.0     |
| 4                        | 1                  | ---              | 24      | --- | 39.0            | 43.3     | 81.0            | 90.0     |
| 5                        | 1                  | ---              | 36      | --- | 52.0            | 57.8     | 108.0           | 120.0    |
| 6                        | 1                  | ---              | 48      | --- | 58.5            | 65.0     | 121.5           | 135.0    |
| 7                        | 1                  | ---              | 54      | --- | 65.0            | 72.2     | 135.0           | 150.0    |

Note 1 : The blue form is the maximum power data rate

## 2.5. Test Environment

| Items                      | Required (IEC 68-1) | Actual   |
|----------------------------|---------------------|----------|
| Temperature (°C)           | 15-35               | 21       |
| Humidity (%RH)             | 25-75               | 50       |
| Barometric pressure (mbar) | 860-1060            | 950-1000 |

## 2.6. Measurement Uncertainty

| Test Items                         | Uncertainty                    |
|------------------------------------|--------------------------------|
| AC Power Line Conducted Emission   | $\pm 2.02\text{dB}$            |
| Radiated Emission                  | Below 1GHz $\pm 3.8\text{ dB}$ |
|                                    | Above 1GHz $\pm 3.9\text{ dB}$ |
| RF Antenna Port Conducted Emission | $\pm 1.27\text{dB}$            |
| Radiated Emission Band Edge        | $\pm 3.9\text{dB}$             |
| Occupied Bandwidth                 | $\pm 1\text{kHz}$              |
| Power Spectral Density             | $\pm 1.27\text{dB}$            |

### 3. AC Power Line Conducted Emission

#### 3.1. Test Equipment

| AC Power Line Conducted Emission / TR-1 |              |          |            |            |               |
|-----------------------------------------|--------------|----------|------------|------------|---------------|
| Instrument                              | Manufacturer | Type No. | Serial No. | Cal. Date  | Cal. Due Date |
| EMI Test Receiver                       | R&S          | ESCI     | 100906     | 2017.03.05 | 2018.03.04    |
| Two-Line V-Network                      | R&S          | ENV 216  | 101189     | 2016.07.16 | 2017.07.15    |
| Two-Line V-Network                      | R&S          | ENV 216  | 101044     | 2016.09.16 | 2017.09.15    |
| 50ohm Coaxial Switch                    | Anritsu      | MP59B    | 6200464462 | N/A        | N/A           |
| 50ohm Termination                       | SHX          | TF2      | 07081402   | 2016.09.16 | 2017.09.15    |
| Temperature/Humidity Meter              | Zhichen      | ZC1-2    | TR1-TH     | 2017.01.05 | 2018.01.04    |

Note: All equipments are calibrated with traceable calibrations. Each calibration is traceable to the national or international standards.

#### 3.2. Test Setup

### 3.3. Limit

| Frequency of Emission<br>(MHz)                                                                             | Conducted Limit         |                      |
|------------------------------------------------------------------------------------------------------------|-------------------------|----------------------|
|                                                                                                            | Quasi-peak (dB $\mu$ V) | Average (dB $\mu$ V) |
| 0.15-0.5                                                                                                   | 66 to 56                | 56 to 46             |
| 0.5-5                                                                                                      | 56                      | 46                   |
| 5-30                                                                                                       | 60                      | 50                   |
| Note 1: The lower limit shall apply at the transition frequencies.                                         |                         |                      |
| Note 2: The limit decreases linearly with the logarithm of the frequency in the range 0.15 MHz to 0.5 MHz. |                         |                      |

### 3.4. Test Procedure

| Test Method                         |                  |         |                                                                                             |
|-------------------------------------|------------------|---------|---------------------------------------------------------------------------------------------|
|                                     | References Rule  | Chapter | Item                                                                                        |
| <input checked="" type="checkbox"/> | ANSI C63.10-2013 | 6.2     | Standard test method for ac power-line conducted emissions from unlicensed wireless devices |
| <input checked="" type="checkbox"/> | ANSI C63.4-2014  | 7       | AC power-line conducted emission measurements                                               |

### **3.5. Test Result**

**Note:** EUT is powered by battery, so this test item is not necessary performed.

## 4. Emissions in restricted frequency bands

### 4.1. Test Equipment

| Emissions in restricted frequency bands (Below 1GHz) / AC-2                                                                                |              |              |            |            |               |
|--------------------------------------------------------------------------------------------------------------------------------------------|--------------|--------------|------------|------------|---------------|
| Instrument                                                                                                                                 | Manufacturer | Type No.     | Serial No. | Cal. Date  | Cal. Due Date |
| EMI Test Receiver                                                                                                                          | R&S          | ESCI         | 100573     | 2017.03.29 | 2018.03.28    |

Note 1: At frequencies below 30 MHz, measurements may be performed at a distance closer than that specified in the regulations; however, an attempt should be made to avoid making measurements in the near field. Pending the development of an appropriate measurement procedure for measurements performed below 30 MHz, when performing measurements at a closer distance than specified, the results shall be extrapolated to the specified distance by either making measurements at a minimum of two distances on at least one radial to determine the proper extrapolation factor or by using the square of an inverse linear distance extrapolation factor (40 dB/decade).

Note 2: At frequencies at or above 30 MHz, measurements may be performed at a distance other than what is specified provided: measurements are not made in the near field except where it can be shown that near field measurements are appropriate due to the characteristics of the device; and it can be demonstrated that the signal levels needed to be measured at the distance employed can be detected by the measurement equipment. Measurements shall not be performed at a distance greater than 30 meters unless it can be further demonstrated that measurements at a distance of 30 meters or less are impractical. When performing measurements at a distance other than that specified, the results shall be extrapolated to the specified distance using an extrapolation factor of 20 dB/decade (inverse linear-distance for field strength measurements; inverse-linear-distance-squared for power density measurements).

#### 4.4. Test Procedure

| Emissions in restricted frequency bands |                                     |                                     |                                     |             |                                                                                                  |                                                                                                    |

**Note:**

1. " \* ", means this data is the worst emission level.
2. Measurement Level = Reading Level + Factor(Probe+Cable-Amp).

## 5. Emissions in non-restricted frequency bands

### 5.1. Test Equipment

| Emissions in non-restricted frequency bands / TR-8                                                                                         |              |          |            |            |               |
|--------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|------------|------------|---------------|

Mode 1 CH01(2412MHz)

## 10. Antenna Requirement

### 10.1. Limit

| Antenna Requirement Limit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <p>An intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator shall be considered sufficient to comply with the provisions of this section. The manufacturer may design the unit so that a broken antenna can be replaced by the user, but the use of a standard antenna jack or electrical connector is prohibited. This requirement does not apply to carrier current devices or to devices operated under the provisions of §15.211, §15.213, §15.217, §15.219, or §15.221. Further, this requirement does not apply to intentional radiators that must be professionally installed, such as perimeter protection systems and some field disturbance sensors, or to other intentional radiators which, in accordance with §15.31(d), must be measured at the installation site. However, the installer shall be responsible for ensuring that the proper antenna is employed so that the limits in this part are not exceeded.</p> |  |

### 10.2. Antenna Connector Construction

| Antenna Connector Construction                                                             |                                                                  |
|--------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| <input checked="" type="checkbox"/>                                                        | The use of a permanently attached antenna                        |
| <input type="checkbox"/>                                                                   | The antenna use of a unique coupling to the intentional radiator |
| <input type="checkbox"/>                                                                   | The use of a nonstandard antenna jack or electrical connector    |
| Please refer to the attached document "Internal Photograph" to show the antenna connector. |                                                                  |
