2. Bluetooth connection

The earphones will enter pairing mode when they are turned on.

Flashing white (Left earphone) Goes off (Right earphone)	Pairing mode
Goes off (Both earphones)	Connected to a device

Reset

If you are experiencing issues with your earphones, such as failure of TWS pairing or functionality issues, you can try to reset your earphones.

- Forget the 'Tronsmart Onyx Ace' in your device's Bluetooth list.
- Take two earphones out of the charging case. Tap and hold the multifunction touch area for 5 seconds to turn them off.
- Tap and hold the multifunction touch area on the earphones for 10 seconds, until the white indicator flashes rapidly.
Note: You can reset the Left and Right earphones independently or at the same time.
- The earphones have been reset to the default settings. Then connect to your device refers to the 'Bluetooth pairing' above.

Charging

Use the comes along with USB-C cable to charge.

If you have any problems while using the product, please do not hesitate to contact our customer support team at support@tronsmart.com.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
