

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled E360179, placed on a blue textured surface. The board is oriented horizontally and features various electronic components, including a large silver electrolytic capacitor (220 35V RVT) on the left, several resistors, and integrated circuits. A ruler is positioned vertically to the left of the board, showing measurements from 0 to 80 mm. Another ruler is placed horizontally below the board, showing measurements from 0 to 100 mm.
Solder Board-Component View 5	 A photograph of a small green PCB component, labeled DC1082-A, placed on a blue textured surface. The board is oriented horizontally and features a few electronic components, including a small capacitor and a resistor. A white connector is attached to the top of the board. A ruler is positioned vertically to the left of the board, showing measurements from 0 to 100 mm. Another ruler is placed horizontally below the board, showing measurements from 0 to 100 mm.

Solder Board-Component View 6	 A photograph showing a small green printed circuit board (PCB) component with a black square component and two thin wires (one brown, one black) attached. The component is positioned next to a black ruler with white markings, indicating its size. The background is a blue textured surface.
Antenna View	Antenna  A photograph showing a larger green PCB with various electronic components, including a blue integrated circuit (IC) and a silver circular component. A red box labeled "Antenna" points to a specific area on the board. The board is placed next to a black ruler with white markings. The background is a blue textured surface.
