Everon 6200

A3-E3-N3 Specification Sheet

Features	
1200MHz Transmission Bandwidth over 1 fiber	8 x 3GPP Band per Remote
Sub 6GHz	Up to 200MHz IBW
Dry contact Alarm	25dBm Maximum Output Power per Band
Support Band or Channel Selective filter	Cascading up to 6 levels

E62-A3 - Access Unit Chassis

The E62-A3 – Access Unit Chassis is a standard 19-inch 2U rack-mounted shelf (1U fan unit included), which serves as the host for Everon™ 6200. The E62-A3 provides coupling access to radio signal sources of multi-operator, multi-system, and multi-band, forming digital optical signals and distributing static capacity distribution to fiber-connected other type devices. One A3 supports up to eight optical interfaces connected to E3s (Expansion Unit) or N3RUs (Remote Unit).

This document describes the installation procedure for the E62-N3 remote unit.

This is NOT a CONSUMER device. It is designed for installation by FCC LICENSEES and QUALIFIED INSTALLERS. You MUST have an FCC LICENSE or express consent of an FCC License to operate this device. NOTE: Only authorized person can enter the area where the antenna is installed. And the person is fully aware of the potential for exposure and can exercise control over his or her exposure by leaving the area or by some other appropriate means. Awareness of the potential for RF exposure in a workplace or similar environment can be provided through specific training as part of a RF safety program.

E62-AU-AC – Active Combiner Module

The E62-AU-AC – Active Combiner Module is the interface to the operator base station signal source equipment. Each module has four QMA ports for signal input from the maximum four operators. One Access Unit can be equipped with up to four modules. In accordance with wireless service provider standards, it is not advised to use digital repeaters as a signal source for Corning solutions.

E62-E3-O - Expansion Unit

The E62-E3-O – Expansion Unit is a standard 19-inch 1U rack-mounted shelf, which serves as the interface between the Primary A3 and the Remote Unit for the capacity expansion of system.

E62-N3RU – Low Power Remote Unit

The E62-N3RU is a low-power remote unit supporting cellular technologies on fiber optic cable using the CPRI protocol. The N3 is ideal for multi-operator multi-band, static capacity distribution deployments of cellular services in small-to-medium coverage areas. The N3 supports up to four 25 dBm RF channels. The N3 converts an optical signal to RF and then transmits at the relevant 3GPP band and receives the analog RF signal, conditions it, and converts it back to optical for routing to the E3 or A3.

The socket-outlet shall be easily accessible.

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Interface	
Access Unit RF Interface	QMA Female
Optical Connector Type	8 x 25 GBps SFP+ Interfaces 6 to 8 optical connections to E3-O or N3 2 optical connections to Secondary A3s
Transmission Rate	25 GB/s
AU-AC modules	4 x AU-AC modules per chassis (RF interface with BTS) Full 3GPP Band per Module (up to 200 MHz)
Band Support	12x 3GPP bands over 1 fiber core (using 2 x Secondary A3)
Dry contact Alarms	1x RJ45 (2x in, 2x out)
Maintenance Interface	Ethernet RJ45
AU-AC power level (dB)	0dBm to +15 dBm Input Power Range for each port

Electrical	
Electromagnetic Compatibility/Interference (EMC/EMI)	3GPP TS38.113
Maximum Power Consumption	85W
AC Power	100-240v AC, 50/60Hz
DC Power	48VDC ± 20%

Environmental	
Mean Time Between Failure (MTBF)	> 220,000 hours
Operating Temperature	-10°C to +45°C
Storage Temperature	-40°C to +85°C
