

Declaration Letter

Our Company (DTEN Inc)

The test cases:

Product: DTEN D7

Model: DB50455

The trademark: DTEN

The WIFI / BT (ESP32-S) module on the motherboard is not tested

Now the statement is as follows:

In the early stage of R & D, the wireless function of this module was considered, but in the later stage, various functions were considered, and the function of the wireless part of this module was abandoned, and it was used as an MCU. Therefore, this test did not test the wireless part of this module.

The software has shielded the wireless function of the module, and promised that the product will not use the wireless function of the module later!
