Powering on and off

The VR glasses automatically turn on when plugged in to a phone, power bank, or any power source. The LED indicator in front will light up when the VR glasses turn on.

Press the Power button for 2 seconds to turn off the VR glasses.

Important: This device can only be used when connected to a power supply through a USB Type-C cable. The internal battery of the device is only used for saving settings when the device is off or for maintenance. The internal battery power supply cannot be used directly.

Putting on your VR glasses for the first time

Your VR glasses need to be set up before using it for the first time.

1. Use the USB Type-C cable in the box to connect the VR glasses to your phone with the setup app installed.
2. Follow the instructions on the app to complete the setup.

Using VR mode

Experience VR with your VR glasses.

1. Connect your VR glasses to a power source. The VR glasses turn on.
2. Wear your VR glasses, and then grab the phone.
2. Use the phone to interact with objects in VR.

Connecting your VR glasses to Wi-Fi

Connect your VR glasses to a Wi-Fi network so you can browse and download VR content.

1. While wearing the VR glasses, use the phone to select **Settings** onscreen.
2. Select **Network**, and then turn the Wi-Fi switch on.
3. Select the Wi-Fi network you want to connect to in the list.
4. Select **Connect**.

Note: If the network has a password, enter the password first.
