alcohol) to clean any part of the unit.

void the user's authority to operate the equipment.

• Do not use a vacuum cleaner to clean the filter or wash it directly. Cleaning & Storage ① Ensure the machine is power-off and unplugged.

③ Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the machine. ④ After the filter is dried, install it into the air purifier to restart. ⑤ If you do not use the machine for a long time, ensure the machine is dry out, put on the dust cover bag and place it in a cool and well-ventilated place. ⑥ To ensure a good performance of the machine, please turn on the machine for a few minutes from time to time. Notice: Please don't drop any water into the machine when clean the air outlet.

FCC Warning:

Any changes or modifications not expressly approved by the party responsible for compliance could

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two

(1)This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off

and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
