Enter the phone number to get the verification code.

Set your login password. After login, follow the APP tips to complete the camera configuration.

## 3 FAQ

### 1.How to reset the camera?

Use the reset pin insert the reset hole on the back of the machine, and press the reset button, about 30s you will hear the prompt 等待 for installation ? that means reset finished.

### 2.Why is cloud video discontinuous?

When you watch it remotely on phone, in order to save mobile traffic and reduce the useless message, to avoid wasting customer's time, remote recording adopts mobile detection mode, the video is only recorded when the object is found moving.

### 3.How much capacity does the TF card support? Format?

At present, the camera supports the FAT32 format Class10 TF card, with the maximum support of 32G, and after TF card is fully loaded it will automatically delete from former video for automatic deletion.

### 4.What Wi-Fi support? What not?

At present only support 2.4GHZ, do not support 5g Wi-Fi. Router encryption support WPA2/WPA2-PSK, do not support WEP, and also do not support hidden SSID.

### 5.Indicator light displays information.

The red light flashing	Waiting for configuration
The blue green light flashing	Connecting to the cloud server
Green light normally on	Normal operation
The blue light flashing	Download the update
Blue light normally on	Camera offline

## Camera wall installation instructions:

### Step 1

The camera is enclosed with wall installation accessories. (Circular iron sheet and 3M glue). The iron can be pasted on the wall or roof.

### Step 2

When the wall mounting accessories are fixed, the camera base can be pulled apart, screw in the direction of the base arrow, and then adsorb on the wall by the base with magnet.

### Instruction

The camera base is designed with magnetic adsorption base. You can stick it on the surface of the fridge, air conditioner, distribution box, etc.

**FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

**FCC Radiation Exposure Statement:**

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
