ATTN.: Reviewing Engineer

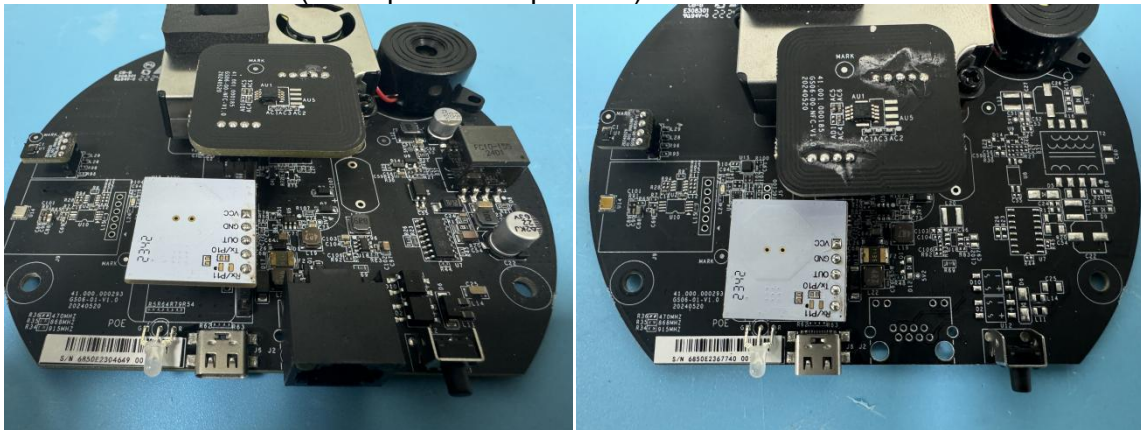

FCC ID: 2AYHY-GS601

Models: GS601-868M/915M, NI601-868M/915M, GS601-915M, NI601-915M, GS601, NI601

We hereby request Family Certification for the above mentioned Models based on them being electrically identical.

We (Xiamen Milesight IoT Co., Ltd.) hereby state that in order to face different markets and customers have different model naming requirements, all models are divided into two versions with POE power supply circuit and without POE power supply circuit. The version without POE power supply circuit lacks the network port and the resistance and capacitance of related circuits. In addition, all models have the same electrical characteristics, including the same software parameters and hardware design (i.e., PCB Layout, RF module/circuit, antenna type(s) and antenna location, components on PCB, etc.), same mechanical structure and design (including product enclosure, materials, etc.). There are no differences between all models other than naming.

Demonstrate the detail(descriptions and pictures) as to the difference list above.

Zhenlong Tong
