

SIZE:7X7CM

Instruction Manual

Model: OR1122-WC

Description: Agate wireless Charger 5W

Wireless charger

General information:

You can easily charge your smartphone wirelessly.

If your phone supports wireless charging, just place it on the charger.

If not, complete the phone with wireless receiver.

Charging time may vary. It's based on the device's battery capacity, charge level, the age of the battery and the temperature in the surrounding area.

Devices may get warm during charging; they will gradually cool down after they are fully charged.

Use steps

Connect wireless charger and power adapter with micro USB cable. Place the smartphone or other device on the charger and adjust position to charge area. The device will start to charge; when finished unplug the charger.

Warning

1. Product must be used as required, otherwise could cause a fire or other dangerous risk.
2. Before using check if the parameters of power adapter and wireless charger are compatible.
3. Store and use in room temperature and dry environment.
4. People who use some medical devices should be careful when using wireless charger.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
