Photo of Conducted Emission Measurement

A photograph of a laboratory setup. A power supply unit is on the floor, connected to a wall outlet and a power strip. A signal generator is on a table to the left, and a power strip is on a table to the right.

A photograph of a wooden table in a room with walls covered in white square panels, likely a calibration or measurement environment. The table is made of light-colored wood with visible grain and knots. The walls are composed of a grid of white square panels separated by dark lines. In the background, there is a piece of equipment on a stand, possibly a camera or sensor, and a blue bag on the floor. The floor is a light-colored, polished surface.
