

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a power supply or amplifier) sits on a light-colored wooden table. To its right, a power strip is plugged into a wall outlet. On the right side of the table, a small black device (possibly a probe or antenna) is connected to the equipment. The background is a plain grey wall.
Radiation Emission View (Below 30MHz)	 A photograph showing a radiation emission test setup. A white, rectangular test chamber or shielded enclosure is positioned in the center. The walls of the enclosure are covered with a grid of white, square-shaped absorbers. A black metal frame stands in front of the enclosure. The floor is a dark, polished surface with yellow and black safety markings. A small black device is visible on the floor near the frame.
